LIFE JACKETS
Do not hesitate to practice with life jackets and get used to wearing them. This is especially true in the case of children. Most children will gladly wear a life jacket if it is presented in the proper manner.

FIRE EXTINGUISHERS
Be certain your boat is equipped with the recommended number of fire extinguishers and of the proper type. Also, have them inspected at regular intervals.

LOOK FOR YOUR SAFE LOAD PLATE
The law requires that every pleasure boat 16' long or under,
powered with an outboard motor or motors totalling 10 H.P. or
more, shall carry a plate issued by the Dept. of Transport stating
the maximum load and H.P. recommended for it.
Applications for these plates should be made to your Customs
Office or from the Dept. of Transport.

DO'S AND DON'TS

DO

- Head for the closest safe anchorage or landing when a storm threatens and avoid the temptation to "buck it".
- Observe the regulations regarding the presence of lifesaving equipment, using only that stamped or labelled "approved" by the Department of Transport.
- Assist any boat in distress. The waving, in a vertical circular motion, of a piece of light coloured material or a light by night is a distinctive distress signal.
- Slow down when passing dredges or water where divers may be working.
- Slow down when making sharp turns, or in bad weather.
- Slow down when passing row boats and canoes, especially in narrow waters.
- Learn the Rules of the Road — and practise them.

PORT ELGIN

RELAX IN THE TOWN OF THE MAPLES

The easy-approach harbour is sheltered and offers snug docking while you enjoy one of the finest shopping centres on Lake Huron, 3200' usable grass landing airstrip, D.O.T. licensed, Port-of-entry, 4 area golf courses, excellent tennis courts, roller rinks, bowling alley, Brewers Warehouse, LCBO outlet, safe swimming, finest beach.

DO'S and DON'TS— (Continued)

DO

- When operating at night, carry a few red flares in a watertight container; the red flares used on railroads are efficient and inexpensive.
- Keep the bilges of the boat clean, free of oil, gasoline and rags, etc. Vent any enclosed areas into the open air.
- Check the battery and its ventilation.
- Respect your boat and know its limitations.
- Follow the regulations regarding fire precautions and fire extinguishing equipment.
- Carry an anchor and sufficient length of sound cable, rope or chain—at least five times the average anchorage depth. Be sure that the inboard end of the line is securely fastened to the boat.
- Wear a lifejacket when in small boats whether or not lifesaving cushions are carried.

When engaged in extended cruising carry the latest corrected charts and related publications in your boat at all times.

DO'S and DON'TS— (Continued)

DON'T

- Stand up or change seats in a small boat, particularly when the boat is full. If necessary, crouch low and keep the weight on the boat's centerline, holding on to both gunwales.
- Operate near swimmers.
- Mix liquor and boating.
- Use a leaky or poorly built boat.
- Cruise fast enough to create a dangerous swell when near small boats.
- Leave your tiller or steering wheel unattended, especially when under way in harbours, anchorages or narrow channels.
- Throw garbage overboard.
- Blow your horn or use the spotlight unnecessarily.
- Wait until the last minute to signify your intentions of obeying the Rules of the Road.
- Anchor close to other boats.
- Cruise at high speed in or near an anchorage.
